Professional Summary

A detail-oriented Data Analyst professional with a strong background in mathematics and statistics. Proficient in using data analysis tools Excel and Power-BI to interpret complex data sets. I have done various Job Simulations with Accenture, Tata and JP Morgan Chase to deep dive into data and business use cases.

Experience

GPA Business Consulting & Advisory | Business Data Analyst 2021-2024

- Implemented efficient database design, resulting in a 30% increase in database performance.
- Conducted trend analysis to interpret complex data sets and drive business growth.
- Delivered customized ad hoc reports to meet specific business requirements.

Industrial Systems | Technical Support 2018-2021

- Resolved critical cases and high-priority escalations, demonstrating strong problem-solving skills.
- Document of all activities, tasks, and procedures, technical issues and resolution steps.
- Provided after-hours support for critical problems, ensuring continuous customer satisfaction.

Escorts Agri Machinery | Trainee 2017-2018

- Gained comprehensive knowledge of the company's agricultural machinery product line.
- Actively participated in team meetings, contributing to problem-solving and improvements.

Education

JC Bose University of Science & Technology, YMCA, MBA 2024

Major: Financial & Marketing Management

Maharishi Dayanand University, Bachelor of Technology 2016

Major: Mechanical Engineering

Kendriya Vidyalaya, Class XII 2011

Major: Physics, Chemistry, Mathematics

Skills

- Technical - SQL, Python, NumPy, Pandas, Power BI, Excel, Tableau.
- Analytical – Data & Statistical Analysis, Data Mining, Data Profiling, BI, Data Visualization,
- Soft - Problem-Solving, Cross-functional Collaboration, Project Management, Communication.
- Other – ChatGPT, LLM, AB Testing

Certifications & Projects

1. **SQL for Data Science, University of California**
 - Data manipulation using SQLITE3 and MySQL Databases.
 - Acquired experience in joining tables using primary and foreign keys, automating searches with views, and expediting searches with indexes.
2. **Data Analysis with Spreadsheets and SQL**
 - Clean data with spreadsheets using formulas to calculate summary statistics.
 - Write foundational SQL statements and queries to extract data from spreadsheets.
3. **Accenture North America Data Analytics and Visualization Job Simulation**
 - Completed a simulation focused on advising a hypothetical social media client as a Data Analyst.
 - Cleaned, modelled and analyzed 7 datasets to uncover insights into trends for decision making.
 - Prepared a PowerPoint deck and video presentation to communicate key insights for the client and internal stakeholders.
4. **Microsoft Power BI Data Analyst**
 - Developed expertise in modeling, visualizing, and analyzing data with Power BI.
 - Gained proficiency in preparing Excel data for Power BI analysis.
 - Acquired skills in DAX calculations and creating compelling reports and dashboards.
5. **Python for Data Science, AI & Development**
 - Apply Python programming logic Variables, Data Structures, Branching, Loops, Functions etc.
 - Proficiency in using Python libraries such as Pandas & Numpy using Jupyter Notebooks.
 - Access and web scrape data using APIs and Python libraries like Beautiful Soup.
